ABOUT ME

Transitioning into Data Analytics with a solid foundation from an MBA in Finland (GPA 4.53/5.0) and over 5 years of experience in Market Research and Sales Management. Passionate about uncovering insights from complex data to enable data-driven business growth. With a background in Market Research and Sales, I view data as the strategic engine of modern business and aim to leverage my analytical skills (SQL, Python, PL-300) to deliver actionable solutions in international business environments.

EDUCATIONAL BACKGROUND

Seinäjoki University of Applied Sciences – Seinäjoki, Finland

Master Degree of Business Administration, 2022 - 2024

GPA 4.5/ 5 | Major in International Business Management

FPT University – Ho Chi Minh City, Vietnam

Bachelor Degree of Business Administration, 2013 - 2017

GPA 3.3/ 4 (ACBSP Accredited) | Major in Marketing | Top 5 Excellent bachelors of the Business Administration Faculty in FPTU.

PROJECTS - See all at [Github](#)

[SQL] E-commerce User Behavior & Conversion Insights - [View more](#)

- Utilized SQL on BigQuery to analyze large-scale Google Analytics datasets, evaluating marketing channel effectiveness by querying key metrics such as bounce rates, monthly traffic trends, and revenue per source.
- Analyzed the end-to-end customer purchase journey to pinpoint critical drop-off points, determining a 40% add-to-cart and 10% conversion rate to provide data-driven recommendations for optimizing user experience and sales.

[Power BI] Strategic Business Intelligence & Market Growth Dashboard - SuperStore Global Retailer - [View more](#)

- Engineered a comprehensive Power BI solution using a fact-dimension data model to process over 51,000 global transaction records, tracking critical KPIs such as \$12.64M in total revenue and a stable 11.61% profit margin.
- Delivered actionable strategic insights to identify high-potential expansion zones (like Canada with a 26.62% profit margin) and pinpoint "profit eroders" (such as the Tables category causing a \$64,000 net loss), resulting in data-driven recommendations for EMEA market optimization.

[Power BI] HR Analytics Dashboard: Employee Turnover & Workforce Performance - [View more](#)

- Analyzed data for approximately 300 employees to track key HR metrics including turnover rate (34.78%), average tenure (12.31 years), and engagement scores (4.11/5).
- Developed a Power BI dashboard using DAX to identify turnover drivers, pinpointing the Production department's high turnover rate (40.69%) and proposing targeted retention strategies.

[Power BI] Marketing Spend and Sales Performance Analysis - E-commerce Fashion Retail - [View more](#)

- Built a Star Schema data model in Power BI integrating 10,500+ records across 4 tables (Orders, Campaign-by-SKU, Product Master, Campaign Cost) with dynamic DAX measures for Week-over-Week ROAS, Budget, and Revenue Growth %, enabling real-time cross-filtering between ad spend and sales performance at SKU level.
- Analyzed 175 campaigns and 184 SKUs to uncover critical budget misalignment: identified a 43.67x ROAS hero SKU severely underfunded at 4.6M VND spend, and diagnosed unchecked low-ROAS campaigns bleeding budget — proposed reallocation strategy projected to deliver +120–180M VND/month in net profit improvement.

[Power BI] Flight Delays and Network Performance Analysis - US Aviation Sector - [View more](#)

- Engineered an analytical dashboard using Power BI to process and model over 5.8 million flight records across 322 airports and 14 airlines using a robust star-schema data model.
- Analyzed On-Time Performance (OTP) and delay distributions to identify root causes of systemic disruptions (e.g., cascading late aircraft bottlenecks), delivering actionable recommendations to optimize flight schedules and improve operational efficiency.

[Python] - Building an Omnichannel Data ETL Pipeline - Techstore Retail Vietnam - [Viewmore](#)

- Engineered an end-to-end Python ETL pipeline utilizing a Medallion Architecture to process over 6 million records, extracting raw data from Google Cloud Storage, applying automated quality checks, and loading it into a 10-table Star Schema in Google BigQuery.
- Developed 3 interactive Power BI dashboards (Customer Journey, Daily Cashflow, and Payment Risk) powered by automated RFM segmentation (5 macro-segments), proactively mitigating synthetic data anomalies through rigorous profiling to deliver highly reliable business intelligence.

[Machine Learning] - Churn Prediction & Customer Segmentation for E-Commerce Retention - [View more](#)

- Developed an end-to-end Machine Learning pipeline using a tuned Random Forest classifier to predict e-commerce customer churn, achieving 95.5% balanced test accuracy on an imbalanced dataset of 5,600+ users.
- Grouped churned users into 4 distinct profiles using clustering algorithms (PCA and KMeans clustering), delivering actionable, personalized retention recommendations (e.g., UX improvements, VIP support) to marketing and product teams.

WORK EXPERIENCES

Restaurant Operations (Sushi Chef → Assistant Manager → Store Manager) – FinlandOctober 2022 – Present

Worked part-time while studying, progressed into management role, demonstrating adaptability and operational leadership in Finland

- Managed end-to-end restaurant operations in two establishments (Itsudemo Sushi Bar, Seinajoki & Sushi Sama Restaurant, Helsinki), overseeing inventory, staff scheduling, quality control, and workflow to ensure operational efficiency and high customer satisfaction.
- Tracked stock levels and sales trends to plan ordering and reduce shortages or waste, while maintaining consistent product quality that helped build a strong base of repeat customers.
- Planned and executed marketing initiatives, managing social media presence (Facebook & Instagram) and online reviews (Google), proactively addressing feedback to strengthen brand reputation and customer retention; organized quarterly in-mall tasting events to attract new clients and maximize engagement (Itsudemo Sushi Bar).
- Engaged directly with customers primarily in English, providing attentive service and understanding basic Finnish expressions when necessary, to ensure positive dining experiences and repeat visits.

Hoozing – Ho Chi Minh City, VietnamSales Account ManagerJun 2019 – Jun 2022

Responsible for driving sales in the Southern region of Vietnam, offering leasing services for premium apartments and office spaces.

- Leveraged internal CRM system (HoozingHIPS) to track and analyze property, customer, and sales pipeline data, enabling data-informed decision-making and consistent achievement of 90–200% of sales targets.
- Applied data driven forecasting and scenario analysis during the pandemic to guide sales strategies and mitigate risks, ensuring operational continuity and earning “Best Sales Team of the Year 2020” and “Best Leasing Team” for two consecutive quarters.
- Analyzed key account and customer data to develop targeted sales strategies, improving client retention and driving sustainable revenue growth from high-value accounts.
- Translated sales and performance data into actionable insights and reports, aligning team execution with business goals and enhancing overall productivity and decision-making.

Buzzmetrics – Ho Chi Minh City, VietnamJunior Research AnalystJan 2018 – Sep 2018

Focused on social listening analysis, tracking campaign performance and consumer behavior to generate actionable marketing insights.

- Analyzed social listening data to track key KPIs such as buzz volume, buzz trend, and campaign sentiment across campaign lifecycles (pre-, during, and post-launch), generating insights that informed marketing strategies for major clients.
- Collaborated with cross-functional teams to optimize data collection and validation processes, enhancing data accuracy and ensuring reliable insights across beverage and agriculture projects.
- Conducted trend and competitive landscape analysis by identifying top-performing campaigns (e.g., seasonal/holiday campaigns) and extracting success drivers, enabling clients to refine strategies and respond effectively to market trends.
- Translated cleaned datasets into structured reports and insight-driven dashboards (PowerPoint), collaborating with clients and external agencies to interpret performance and drive actionable improvements in campaign effectiveness.

SKILLS

Technical skills:

- BI & Data Visualization Tools:
 - Power BI (Advanced - DAX, Power Query, dashboard design)
 - Power Apps & Power Automate (Foundational)
- Data Handling & Databases:
 - SQL (MySQL - Intermediate), ETL processes, data cleaning & transformation
 - Excel (Advanced - pivot tables, formulas, reporting)
- Programming & Analytics:
 - Python (Intermediate - pandas, numpy, matplotlib, seaborn)
 - Machine Learning (Applied / Intermediate - Random Forest, K-Means, PCA, hyperparameter tuning, feature important analysis)
 - Statistics & Data Analysis (Hypothesis testing, distributions, correlations)

Soft skills: Teamwork and Collaboration | Team Leadership | Problem Solving | Adaptability | Creative&Critical Thinking

Languages: English – Professional working proficiency, Chinese and Finnish – Limited working proficiency

ACHIEVEMENTS & CERTIFICATION

- PL-300: Microsoft Power BI Data Analyst certificate (2026)
- HackerRank Intermediate SQL certificate (2026)
- HackerRank Basic SQL certificate (2025)
- Certificate of Junction Hackathon 2024 - Helsinki Finland (11/2024)
- Certificate of Completion the Graduate Seminar GMS Fall Program in US (11/2024) and in Germany (11/2023)
- Silver Award: Won the 1st runner-up prize for the National Finnish Final of the IPMC Competition (05/2024)
- Best Paper Award at KLICELS8: the research published on [Journal of Education and Social Sciences, Vol. 8, ISSN 2289-1552](#) (12/2017)
